#### ABOUT SCOTT:

Scott's portfolio covers an area that is vital to the residents and future of the Sunshine Coast. The livability of the Sunshine Coast is dependent upon well planned and implemented rail and bus infrastructure. The upgrade of the rail corridor to Nambour and more user friendly timetables are just some of the issues you may wish to hear Scott talk about. In November 2010 Scott was elevated to the Shadow Ministry becoming Queensland's first Shadow Minister for Science, Research and Information & Communication Technology. In April 2011 Scott was appointed to the senior position of Shadow Minister for Transport, Multicultural Affairs and Arts.
